

Evidence	Rule (Warrant)	Conclusion

# CSI MIKE'S CLASS

1. Do you think Queenie is telling the truth?
2. Find all the evidence you can that indicates whether or not Queenie is telling the truth. Make a list of all the evidence. Evidence includes concrete, observable information; personal testimony; written documents; and material objects and their condition or experience.
3. Next explain how each piece of evidence supports your claim that Queen is or is not telling the truth. Each explanation will be generally accepted as rule, which may begin with a phrase such as, "As a rule...." If other members of your team disagree with you, find evidence that will convince them.

Be prepared to explain why your evidence supports your case.

Eventually you will write a report to convince the others in the class that your analysis makes the most sense.

At five-feet-six and a hundred and ten pounds, Queenie Volupides was a sight to behold and to clasp. When she tore out of the house after a tiff with her husband, Arthur, she went to the country club where there was a party going on.

She left the club shortly before one in the morning and invited a few friends to follow her home and have one more drink.

They got to the Volupides house about ten minutes after Queenie, who met them at the door and said, “Something terrible happened. Arthur slipped and fell on the stairs. He was coming down for another drink—he still had the glass in his hand—and I think he’s dead. Oh, my God—what shall I do?”

The autopsy conducted later concluded that Arthur had died from a wound on the head and confirmed that he’d been drunk.
